HOUSES (BHAVAS)

The houses or Bhavas represent a “snapshot” of the heavens and show the position of the earth relative to the zodiac at a particular time and location. In your birth chart, the first house or ascendant signifies the sign the eastern horizon falls in at the time of your birth. The remaining houses follow in a sequential order and each house governs a different area of a person’s life. The houses are grouped into various categories according to their nature. Houses 1, 5 and 9 generally bring about luck and good fortune. Houses 1, 4, 7 and 10 are considered beneficial and give stability to one another. Houses 6, 8 and 12 are considered difficult and can cause problems in a person’s life.

TITHIS

The Moon travels through different phases. It waxes (grows) from New Moon to Full Moon and wanes (decreases) from Full Moon to New Moon. Each phase is known as a Tithi or one lunar day (not a Solar day). The duration of each phase varies in length from approximately 19 to 26 hours. A Nitya Devi, or goddess, is associated with each phase of the Moon. Each tithi has different energies and is good for specific purposes. Paying attention to the Phase of the Moon (Tithi) can help you improve your time management. In general, it is best to start new projects during the waxing phase and work on things you wish to dissolve during the waning phase.

NAKSHATRAS

Each month the Moon travels through 27 Nakshatras or asterisms. Each Nakshatra spans 13 degrees, 20 minutes of the 360 degree Zodiac. Your birthstar is the nakshatra your moon falls in at the time of your birth and is very important in Vedic astrology calculations. In Vedic rituals, the priest will request your name along with your birthstar. Each month, an auspicious day of power occurs for you when the moon enters your Nakshatra. Your Nakshatra is an archetype that can give you blessings as you befriend it.

DASHA

Throughout your life certain planets have a more prominent impact than others. The Vimshottari Dasha system calculates these periods based on the placement of your moon at the time of your birth. The main planet of influence is known as the Mahadasha. The Bhukti, which is also called the subperiod, is the minor planetary influence within that dasha. Dr. Pillai recommends doing remedies for your primary planet of influence (dasha) regardless of whether it is a good or bad planet for you. This is a gesture of respect for the importance the planet is currently having on your life.

5 ELEMENTS

There are five fundamental elements that make up all of creation: Earth, Water, Fire, Air and Space. Space is the most subtle element which contains and animates each of the grosser elements. The four remaining elements are associated with the twelve signs of the zodiac, a total of three signs per element. The air signs Gemini, Libra and Aquarius reflect intellect, movement and flexibility. The signs Aries, Leo and Sagittarius have fire traits like vitality, courage and ambition. The water signs Cancer, Scorpio and Pisces are characterized by receptivity, fluidity and emotion. Finally, the earth signs Taurus, Virgo and Capricorn give support, consistency and stability.

GEMSTONES

Each planet is associated with one or more gemstones. Wearing the appropriate gemstones (usually in a setting that allows the stone to touch the skin) is a powerful remedy in Vedic astrology. The vibration of the gemstone helps you attune to the blessings of the planet. A trained astrologer can evaluate your chart and determine which gemstones are appropriate for your current life situations. The gemstone associations are Sun: Ruby, Moon: Pearl, Mars: Red Coral, Mercury: Emerald or Jade, Jupiter: Yellow Sapphire, Venus: Diamond, Saturn: Blue Sapphire, Rahu: Hessonite and Ketu: Cat's Eye.

HOMAS

Homas are special fire ceremonies (also referred to as fire labs) in which an ancient technology is used to invoke divine beings through fire, prayer, offerings and special mantras. The fire element itself is a purifier. It purifies food, sanitizes water and even transforms base elements into Gold. It can transform earth and water elements into ether. In the homa, fire is used to transform your prayers to space where it is received by divine beings who in return extend their angelic protection and intervention in your life. Dr. Pillai has directed AstroVed to sponsor a FREE monthly webcast of a Vedic ritual such as a homa. We invite you to watch at <http://www.astroved.com/live.asp>

PRADOSHAM

Pradosham is a special window of time in which it is easier for karma to be removed by Siva. Each day around sunset is a daily Pradosham. There is also a special Pradosham day that occurs twice a month during the Thirteenth Moon Phase. On Pradosham day you can pour milk over a Siva lingam and chant: THIRU NEELA KANTAM/MAKARAL SIVAYA NAMA and it will help dissolve your karma faster. If you do not have a Siva lingam, you can use a small smooth rock. Dr. Pillai encourages everyone to participate in Pradosham rituals and take advantage of the Pradosham days each month.
